📅 23/02/2003

Profile

Enthusiastic computer science graduate eager to leverage programming skills and problem-solving abilities in a challenging software development role. Aiming to contribute to innovative projects and grow within a dynamic team.

Skills

Java

- >Proficient in Object-Oriented Programming (OOP) concepts.
- >Strong understanding of Exception handling mechanisms for creating fault-tolerant applications.
- >Expertise in the Java Collections Framework, including Lists, Sets, Maps, and Queues.
- >Skilled in Multithreading to develop high-performance, thread-safe applications.

Web Development

- >Proficient in writing semantic HTML to create well-structured and accessible web pages.
- >Skilled in using CSS3 for creating responsive layouts and Familiar with Javascript

SQL

- >Proficient in designing and managing relational databases using SQL with expertise in CRUD operations and normalization techniques.
- >Skilled in writing and optimizing subqueries and implementing Joins for complex data retrieval.
- >Experienced in utilizing SQL functions and pseudo-columns for data analysis and reporting.

Frameworks

- >Proficient in Spring Core and Spring MVC, leveraging IoC and Dependency Injection to build scalable, modular, and maintainable applications.
- >Proficient in JDBC for seamless database connectivity and efficient data handling in Java applications

Education

Bachelor of Engineering

Pvkk Insitute of Technology
CGPA:7.5

02/2020 – 05/2024
Ananthpur,
Andhrapradesh

Intermediate

MPC
CGPA:9.3

03/2018 – 03/2020
Kurnool,
Andhrapradesh

SSC

Sri Lakshmi High School
CGPA:10.0

03/2017 – 03/2018
Kurnool,
Andhrapradesh

Certificates

- Java developer Intern
- Java FullStack Development

Projects

SECURE ORGAN DONATION: LEVERAGING BLOCKCHAIN

01/2024 – 05/2024

In this project, we have proposed a private Ethereum blockchain-based solution that manages organ donation and transplantation in a decentralized, accountable, auditable, traceable, secure, and trustworthy manner. We developed smart contracts that ensure the data provenance by recording events automatically. We present six algorithms with their implementation, testing, and validation details.

Supply Chain Management System :

05/2025 – 06/2025

Developed a web-based Supply Chain Management System to manage suppliers, customers, products, and orders efficiently. Designed RESTful APIs for CRUD operations. Implemented Spring Data JPA repositories for seamless interaction with PostgreSQL database. Managed entity relationships: One-to-Many between Customer & Orders, Supplier & Products. Used Spring Boot for rapid development and Postman for API testing. Ensured proper validation and exception handling to improve API reliability.

Internship

JAVA Developer Intern:

05/2023 – 06/2023

During a 45-day intensive learning internship, I undertook the challenge of designing and implementing a comprehensive School Management System using Java. This project allowed me to apply and enhance my programming skills while gaining valuable insights into software development methodologies.

Hyderabad

Awards & Achievements

Achieved prizes in the events of the Coding contest, Technical Quiz, and Tech hunt held by PVKK College of Engineering.

Interests

- > Photography editing
- > video editing and reading

Declaration

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
